## DETAILED ACTION

### *Election/Restrictions*

1. Claims 8-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the Office Action mailed on 29 August 2003.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 4-6 and 20-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,643,207 to Rise in view of U.S. Patent No. 5,584,885 to Seckel.

Rise discloses an implantable infusion device for delivering a medicament composition to a target site through a catheter having a reservoir and medicament composition. Rise, however, does not disclose that the medicament composition include living cells and a second medicament composition. Seckel teaches a medicament composition including living cells and a second medicament composition (col. 7, line 17 through col. 8, line 12). It would have been obvious to one of ordinary skill in the art to modify the invention of Rise by including the composition of Seckel to provide a therapeutic effect to more than one part of the body. In reference to claims 5 and 6, it is considered to be inherent that such cells will produce an exogenous substance.

Art Unit: 3767

3. Claims 7, 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rise in view of Seckel, further in view of U.S. Patent No. 5,738,129 to Medenica.

Rise and Seckel disclose the claimed invention except for a reservoir containing a cell maintainer adaptive to maintain the cells in a dormant state, wherein the cell maintainer comprises a coating on the interior of the reservoir and wherein the cell maintainer comprises vitamin A derivative retinoic acid. Medenica discloses such a composition. See col. 4, line 5 through col. 6, line 18. It would have been obvious to one of ordinary skill in the art to use the cell maintainer of Medenica in the invention of Rise and Seckel since such reservoirs are notoriously well known in the art for allowing cells to maintain a dormant state.

#### *Response to Arguments*

4. Applicant's arguments filed 29 September 2005 have been fully considered but they are not persuasive.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

Applicant seems to argue that the use of the Seckel reference would be improper because Seckel does not teach an infusion device for delivering medicament to a target site through a

Art Unit: 3767

catheter. The Examiner uses a different reason for combining. The Examiner relies on the Seckel reference merely for the suggestion of the medicament, not for the teaching of an infusion device with a catheter. The rejection under 35 U.S.C. §103(a) is hereby maintained.

### *Conclusion*

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
